

cl045 | Huron - Pictures Of The Past

The Future Lies In The Past

A much welcome return to full-length releases, co-label founder, prolific Berlin producer and DJ Huron unleashes his most accomplished work to date: a soothing, evolving album where 40 phantom deep drones create an aura of mystique, where the crunchy detailed beat work put the rhythm into place. A definite matured work from his trademarks styles, the mellow melodies melt the cold glacier ice of this winter and send us straight into a mind trip, whilst the brainy downtempo and glitchy grooves just make us wanna close our eyes and float adrift beyond the milky way.

Closing a great year for Crazy-Language, Pictures Of The Past comes full circle to what the label has represented throughout it's existence, keeping fantastic perspectives for future things to come. (F.G.)
