Extract from: Alan Moore "Fossil Angels"

What is an hermetic ritual?

Five punk guys drinking beer & whiskey, smoking joints & punishing their instruments.

We are creating music. This is ART. Creation is sublime.

We have our own dresscodes, our own sacred items (beer & hemp), our own church (garage, den or club). THIS is a religion.

We believe in nothing, but we exist. We do believe in ourselves.

We are our own gods.

We choose the icons of our own mythology.
