# The Unfoldment

John Ov3rblast

## Notes

When I mentioned I had started a netlabel to John, he immediately replied that he was going to send me an EP. I couldn't believe it. John knows me as a writer and podcaster, not as a label operator. So, for him to put this kind of faith in Cerebral Audio releasing a piece of his work is a big deal.

Then I started thinking about it. He does have releases on over 40 labels. The last time I reviewed one of his works (*Yours Faithfully*, back in 2013), I really liked it. Now it started to make sense. John is a prolific artist that is pushing the boundaries of his approach to music, finding another avenue to release and diversify his work is well in keeping with his approach to music.

Take *The Unfoldment* as an example. The four tracks that comprise this release are an enigma. The titles are in a couple of different languages. They have similarity in tone and texture, which gives a unified overall feeling to the release. And yet, each piece is different. These are done with a pulse that provides a sense of motion against the shifting tones that make up the soundscapes. These are deep, dark ambient spaces for you to explore.

Even the choice of artwork plays into the theme of the release. The rolling hillside seems to be unfolding in front of you, the way the layers of the soundscape unfold before your ears.

As for the titles on this release? And how do those titles relate to the release title? We'll leave that for you to decipher. Something to think about as you experience these works. That is the hallmark of what Cerebral Audio is about: producing works that give the listener something to think about. A way of adding another dimension of the the audiotry experience. We are proud to welcome John Ov3rblast, and believe this is a release you won't soon forget.
